BY MODE

## Filter

⑦ CHORDOPLETH  
MAP - PATRONAGE  
INTENSITY

This is too similar to ①, and  
was a less informative idiom  
(choropleth) to represent our  
train station datasets.  
Can colour ① to encode  
another attribute of  
the dataset

⑨ BAR GRAPH

This is too similar to ⑤, which is  
a more complex idiom. ⑨ can also  
represent the dataset by time of  
day, providing better interactive  
options.

## Categorise

Where overcrowding happens,  
when people take PTV most?

①, ④, ⑤, ⑨

When people take Public Transport most:

①, ⑤, ⑪, ⑬ - Daily view

How are people taking PTV?

②, ③, ⑧, ⑥

How has it changed over time?

④, ⑥, ⑧, ⑩, 1

## Combine & Refine

⑨ is too similar to ⑩ but  
less interactive, so ⑩ can  
be chosen instead.

⑦ may be difficult as our  
dataset does not have postcode  
information.

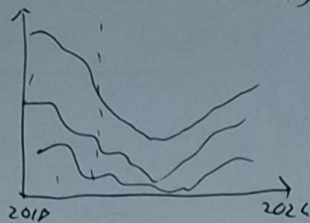

## Summarise and question

Does this vis answer how public transport in Metropolitan Victoria has changed over time?  
Does this vis have a clear storyline? Or does it just display information?

## Big Picture / Layout

Text introduction  
explaining importance of  
public transport  
& its trends over time

## Temporal Line chart with filtering

Sheet 23,4

Name Daniel Corcoran

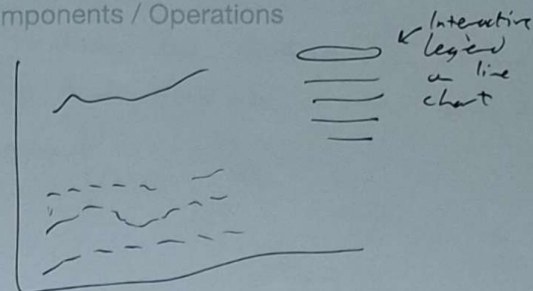

Date 26/09/25

Title "The Daily Seat Struggle"

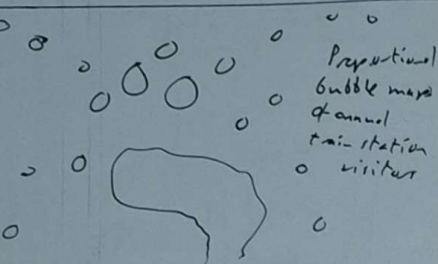

## Description

A Static, single 2-column layout

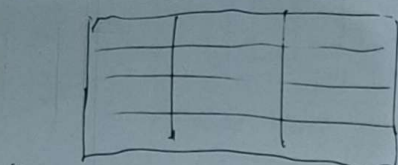

## Components / Operations

This will have a basic 2 column layout

Text explaining general trends of where people catch the train the most

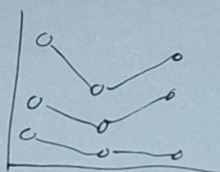

Text explaining daily transport trends

Heatmap highlighting busyness @ time of day

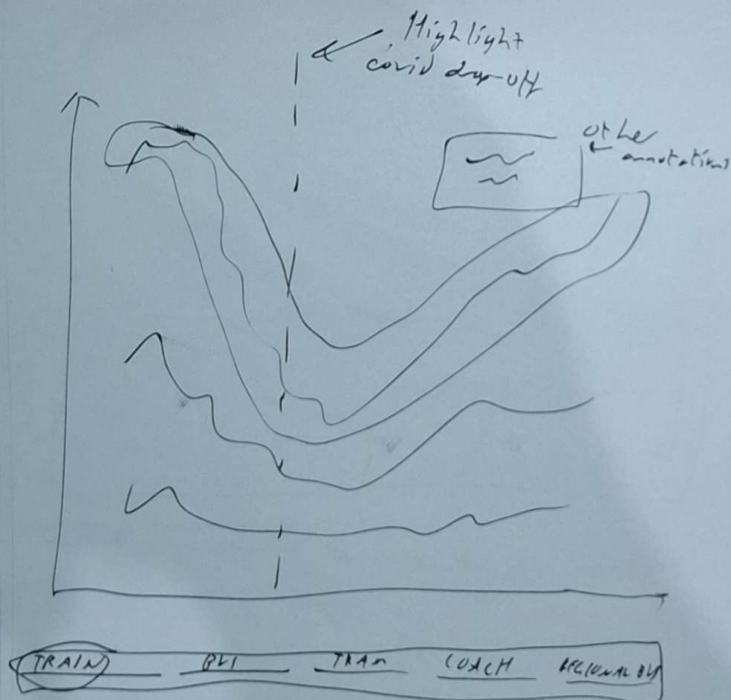

Concluding statements

Slope chart by package type

## Part / Focus

Temporal line chart with filtering & annotations

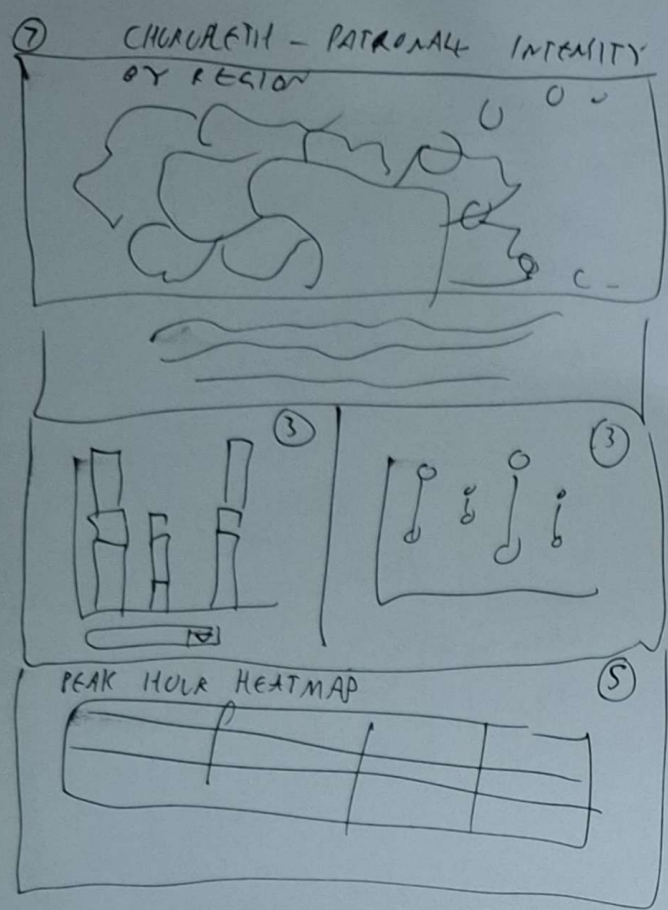

Legend which filter at one notes

## Pro & Cons

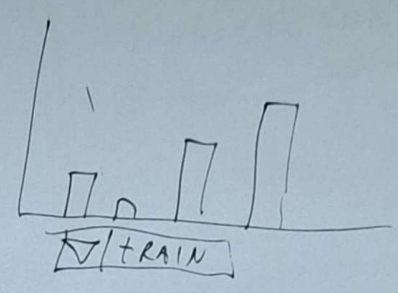

Effective in storytelling, but lacks interactivity, creativity

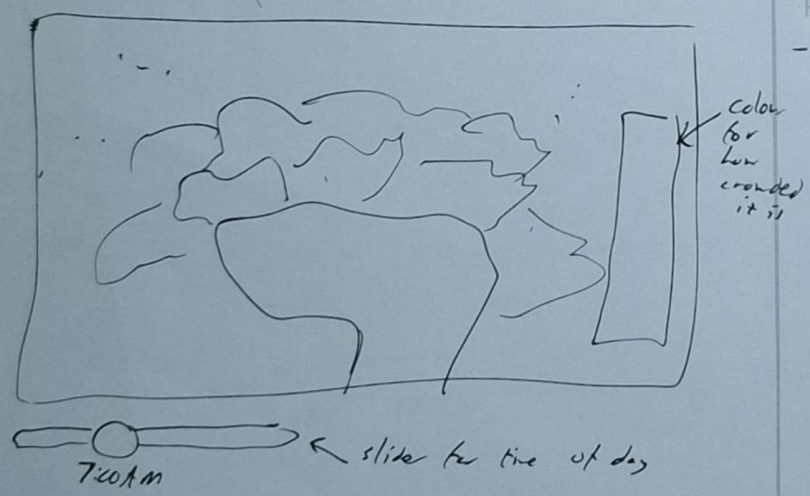

Components / Operations

③ - stacked bar chart to have drop-down list that allows user to view basic bar chart

Part / Focus

CHOROPLETH - PATRONAGE INTENSITY BY REGION

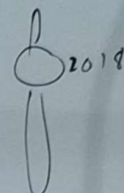

Pro & Cons

- Difficult to implement, but interesting and informative
- Lack of story telling overall.

Year slider for map

Tooltips on isotype chart showing # passengers

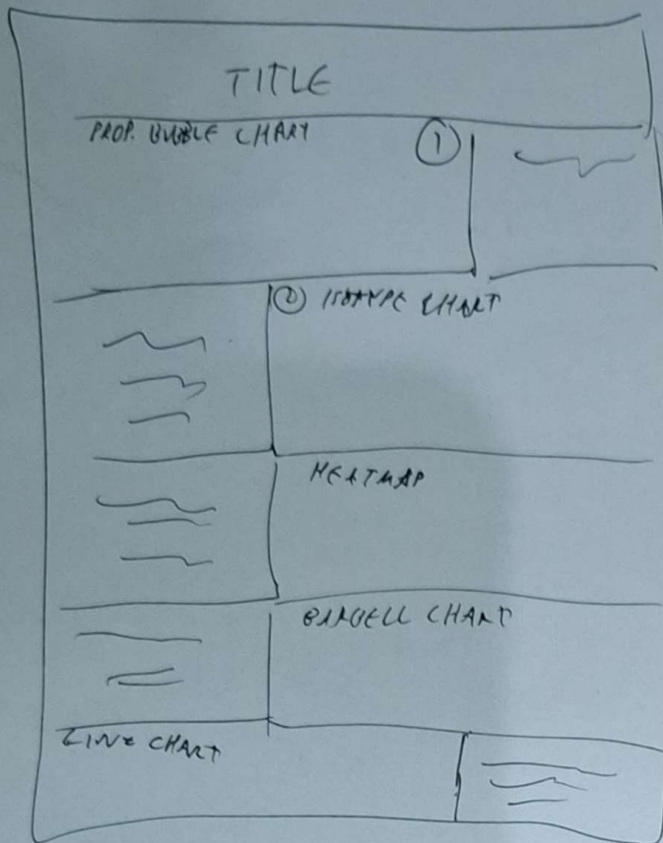

ANNUAL PASSENGERS

Zoom option, year slider.

- Main map is good, other two very basic.
- Map may be slow to load

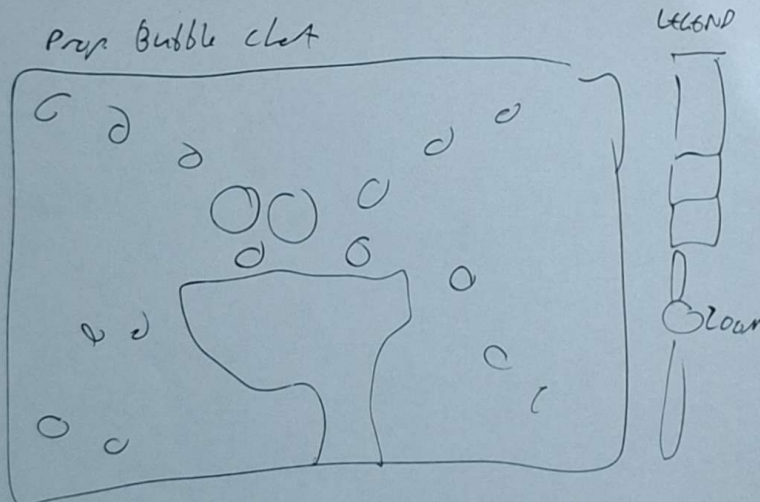

Magazine style with some interactivity, basic filtering.

### Components / Operations

Will <sup>have</sup> zoom option on map  
 Will encode line commuter dominated stations  
 as by colour.  
 Tooltips & annotations on each chart.

### Part / Focus

### Details

Basic storyline:

- How PTV is currently performing
- Where, when is it busy, where/when is it not.
- Improvements needed, current challenges.
